

SQL HAVING

HAVING

Comes after GROUP BY clause

Filters groups of rows

Similar functionality to WHERE,
but WHERE can only filter
individual rows

```
SELECT
    column_1,
    column_2,
    ...,
    aggregate_function(column_3)
FROM
    table_name
GROUP BY
    column_1,
    column_2,
    ...
HAVING
    conditional_expression;
```

GROUP BY example

Count number of books per genre

	id [PK] integer	title text	author text	genre text	year integer
1	1	Frankenstein	Mary Shelley	Novel	1818
